

IPA goes Scientists 4 Future Mainz Wiesbaden

Franziska Teubler, Joachim Fallmann, Philipp Reutter, Heiko Bozem

Scientist4Future (S4F) is a consortium of 26000+ Scientists within Germany, Austria and Switzerland which officially support the intention for the demonstrations of the Friday4Future movement and provide scientific facts underpinning their claims. This presentation aims for giving a brief summary about the origin and the development of S4F Germany, its role for the climate policy in Germany and in particular highlights the efforts of the newly formed regional S4F Group in Mainz, Wiesbaden, which is mainly coordinated by the IPA. A second part will focus on climate change in Rheinland-Pfalz and Mainz/Wiesbaden in particular, referring to the recently published KLIMPRAX-study.
